

Case number 2012060954

Date found April 17, 1992

Age 30-50 Yrs. Old

White Male

Weight 175 Lbs

Height: 5'10"

Probable Year of death 1991-1992

All parts were recovered , Only head has survived. Other remains are unaccounted for
Mummified

Hair: Sandy brown with equal amounts of grey

Medical: Gallstones and fatty liver

Clothing on body white pair of underwear with no tag

Circumstances of death

Male was found washed ashore and mummified. it appeared from autopsy that the victim was placed in a cooler and frozen for an unknown period of time and placed in water later. Estimated time of death 4 to 12 months prior to being found. Body at location when found 2 to 3 weeks

the feet both have lateral deviation of the distal two phalanges of the second toes, straight first toes, slight lateral deviation of the distal two phalanges of the middle toes, more to the left where there is a hammer deformity with dorsiflexion of the distal phalanx, and slight inward deviation of the distal ends of both fifth toes. He has a very pronounced jaw line (Square)

Dentals are available, x-rays available

The right upper third molar and both lower third molars are impacted, horizontal. There is mottling of the enamel of the teeth.

DNA Available soon

The male was believed to be aboard a boat from overseas and frozen.

He was then dumped overboard and found at Chevron in Pascagoula on shore.

He was mummified when found.
